NRF Series Noise Reduction Relief Valve

Application

For use with cryogenic liquid cylinders to provide substantial reduction of discharge noise in sensitive environments. Our patent pending design allows for an efficient and environmentally friendly flow path.

Features

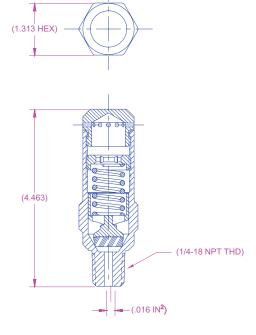

- Packages and cleaned for oxygen service per CGA G-4.1
- · Bubble tight at 95% of set pressure
- Temperature range -320°F to +165°F (-196° to +74°)
- · 100% factory tested

Materials

Body	Brass
Spring	
Seat Retainer	

NRF Series
