

# POL Plugs

**10538P**

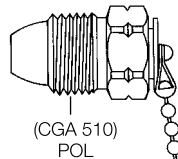

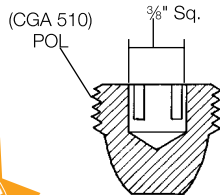

(Has hole for attaching wire to prevent loss of plug)

**N970P**

Highly recommended for installation in LP-Gas cylinder valve POL outlets whenever the service line is disconnected or when the cylinder is being transported.

When properly installed, the POL plug is designed to prevent contamination of the valve outlet and guards against product leakage if the cylinder valve is accidentally opened.

**3705RC**  
W/Chain & Ring
