

Delta Port™ Relief Valve Manifolds

8530/AA8530 Series

Application

Designed especially for use as a primary relief device on large stationary pressurized storage containers, the base is supplied with a two-inch NPT threaded container connection. These manifolds incorporate an additional relief valve, not included in the flow rating, allowing for servicing or replacement of any one of the relief valves without evacuating the container. The hand-wheel on the manifold selectively closes off the entrance port to the relief valve being removed while the remaining relief valves provide protection for the container and its contents. All manifold flow ratings are based on flow through the relief valves after one has been removed for service or replacement.

Materials

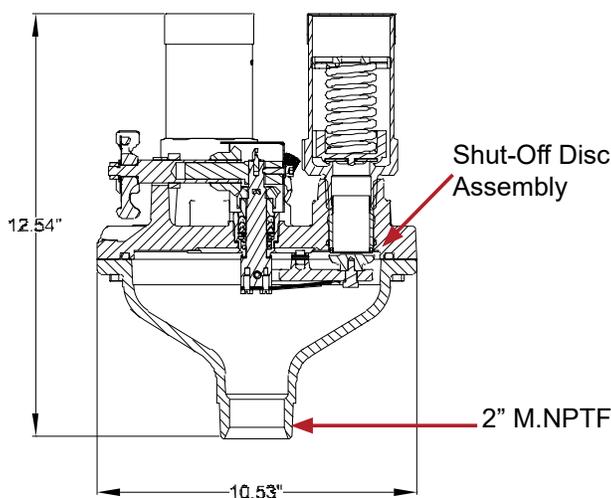

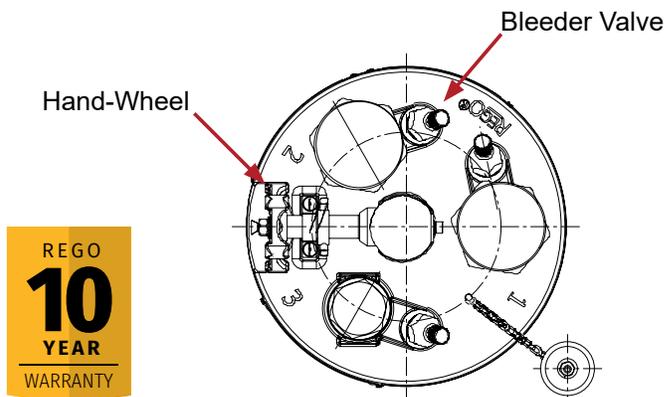

Body Ductile Iron
 Resilient Parts Teflon
 Clapper Disc Stainless Steel
 Bleeder Valve Stainless Steel

Relief Valve Materials

Body (3135) Brass
 Spring Guide (3135) Brass
 Body (AA3135) Aluminum
 Spring Guide (AA3135) Aluminum
 Spring (3135 & AA3135) Stainless Steel
 Seat Disc (3135 & AA3135) Resilient Synthetic Rubber

8533AG

* Flow rating based on number of relief valves indicated in parentheses ().
 Flow rates shown are for bare relief valves. Adapters and pipe-always will reduce flow rates as discussed in forwarding information in L-500 catalog. ** 2" F. NPT outlet connection
